

SMD Booking Export Parameters

1. So that we can audit and verify your clients audio campaign, our system requires a SMD/Booking Export of the campaign. The below screenshot is the parameters AudioNET requires in each campaign export.
2. Export the campaign from SMD as per the below as a .csv file. Saving a report with these parameters in your own files will ensure correct data is provided each time.

Please refer to the **“Audio Verification Procedure”** tip sheet for the next steps in getting you clients radio campaign monitored by AudioNET.
